
Â¿HOW TO? Large images scroll

Posted by kerman - 2007/10/31 15:10

I see that here in the official fireboard forum, when a user insert a LARGE image, the forum displays a scroll bar so the template doesn't breaks.

As this feature is not yet implemented in current release, i want to know if any dev can tell me how to achieve this modifying the code or whatever.

I think it maybe can be a template edit, inserting a iframe, isn't it?

Thanks!

Re:Â¿HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/01 00:26

Maybe a CSS modification. I haven't gotten to check into it.

Re:Â¿HOW TO? Large images scroll

Posted by kerman - 2007/11/01 00:31

I got the solution thanks to Carreon from Joomla! MÃ©xico

The thing is create a iframe in the correct template:

components/com_fireboard/template/default/smile.class.php

Find the code:

```
// img
$fb_message_txt = preg_replace("/\)(.*)\Vsi", "", $fb_message_txt);
$fb_message_txt = preg_replace("/\)(.*)\Vsi", "", $fb_message_txt);
$fb_message_txt = preg_replace("/\)(.*)\Vsi", "", $fb_message_txt);
$fb_message_txt = preg_replace("//si", _LINK_JS_REMOVED, $fb_message_txt);
```

EDIT: And replace with the screenshot code two post downhere

Re:Â¿HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/01 00:36

What's different? Looks the same.

Re:Â¿HOW TO? Large images scroll

Posted by kerman - 2007/11/01 00:40

Sorry, i don't know why, but i paste the other code and it replaces with the same other...

I think the word I-F-R-A-M-E is blocked for security reasons so.....I POST A SCREENSHOT!

Re: HOW TO? Large images scroll

Re: HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/01 00:49

Excellent. Will sticky this.

=====

Re: HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/01 00:51

One thing. Could you paste this into a text file and attach it here?

=====

Re: HOW TO? Large images scroll

Posted by kerman - 2007/11/01 00:52

Great.

Maybe someone can improve this so it works also for CODE and QUOTE.

HERE IS THE REPLACEMENT CODE IN TXT. <http://fireboard.bestofjoomla.com/images/fbfiles/files/code-a363d7c4ae90a429257872f6fc522fa8.zip>

Re: HOW TO? Large images scroll

Posted by bunglehaze - 2007/11/04 19:23

excellent stuff Kerman.. Now to rack your brain...

Do you have any clue how to make the full size image pop up rather than resize in window?? I like the way the images resize for the browser resolution but I think this solution may carry a lot more value if the full image launched in a seperate screen on click.

cheers

leigh :D

Re: HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/04 19:30

Maybe even popup on click? Best of both worlds there.

Re: HOW TO? Large images scroll

Posted by juanma - 2007/11/04 20:41

There are a problem in this code.

I put it, and this produce a error in the signature. It appers very long when anything put a image, this apperas with a height of 500

View image:

<http://2008valencia.com/signature.jpg>

The problem are in smile.class in the thirth added line of \$fb_message_txt: exactly in height="500"

<http://fireboard.bestofjoomla.com/images/fbfiles/images/code-99798e9e75c84ea8be87b16e73ac2064.jpg>

I couldn,t correct the error, but I see that in this forum the signature works fine.

Can anything say to me the correct code please?

Re: HOW TO? Large images scroll

Posted by bunglehaze - 2007/11/05 04:58

Juanma, unfortunately this is a byproduct of the hack, if you want to remove all the whitespace you must change the 500 figure for something more appropriate but it will result in smaller viewport for the images when you click on them.

If you choose 100% instead of 500 it seems to just create a thumbnail type version of the original, this is why I asked about a popup on click or _blank screen on click instead of scrolling.

all the best

Re: HOW TO? Large images scroll

Posted by juanma - 2007/11/05 09:34

Thanks bunglehaze. But I see that in this forum, the error don't exists. I put a image in the signature a works fine.

You could use a small piece of CSS to display a scrollbar when a picture is too wide. Just put the code below into your CSS file. You will probably need to change the width to match the width of your template.

```
/* Restrict the width of forum messages */
td.fb-msgview-right table tr td div.msgtext
{
width: 666px;
```

```
overflow: auto;
}
```

```

Uauh! Many thaks, This works correctly and is what it was looking for. Modifying the code in smile.class I have had many problems but this goes better.

Thanks!

Re: HOW TO? Large images scroll

Posted by kerman - 2007/11/09 18:52

Ill test it right now!! thanks for another tip on this!

Re: HOW TO? Large images scroll

Posted by grumblemarc - 2007/11/09 20:06

I thought it might be best controlled through CSS. Hope it works.

Re: HOW TO? Large images scroll

Posted by kerman - 2007/11/10 03:52

Works perfect!!!!

Best solution, better modify only CSS file.

Did you test this with IE?

Posted by grmi64 - 2007/11/12 02:26

It seems to work on Firefox but using IE 7.x causes the width to shift to the max size that is specified in the css.

-Greg

Re:Did you test this with IE?

Posted by kerman - 2007/11/12 02:35

Greg, what solution do you refer?
Php code edit or CSS?

-Greg

I've tested it with IE 7, Firefox and Safari for Windows, and it works fine in those browsers. You can see it in action [here](#).

The width specified for div.msgtext in the CSS should be equal to the total width of your page (in my case 868px) minus left column and margins.

Note that IE for some reason always adds a vertical scrollbar as well as a horizontal, even though it is really not needed.

I couldn't find it either using FB 1.0.4.

Re:Â¿HOW TO? Large images scroll

Posted by grumblemarc - 2008/01/29 04:31

Anybody here try Multithumb?

Re:Â¿HOW TO? Large images scroll

Posted by 450Thumper - 2008/01/29 04:48

I tried multithumb and received user complaints because of load times.

Re:Â¿HOW TO? Large images scroll

Posted by grumblemarc - 2008/01/29 04:51

Yes. It will do that. The only drawback I've found actually.

Re:Â¿HOW TO? Large images scroll

Posted by 450Thumper - 2008/01/29 05:20

I have changed the CSS sheet as described above and hopefully there won't be too many Safari users on the site. :)
Now if we could just get the multi-upload image to work w/ FB 1.0.4, I would be all set!

Re:Â¿HOW TO? Large images scroll

Posted by nanaya - 2008/01/29 08:32

I just went to the Fireboard config. An I just set the Max. Image Width Under Uploads. to whatever match that would match my template of my site.

=====

Re:Â¿HOW TO? Large images scroll

Posted by 450Thumper - 2008/01/29 17:18

That works unless they use an outside image host and then add no parameters on the BB code when the link to the image.

Re:Â¿HOW TO? Large images scroll

Posted by nanaya - 2008/01/29 17:23

Oh Also I went to the forum.css in the template I'm using and added these lines on the bottom of the file.

```
/* Restrict the width of forum messages */
td.fb-msgview-right table tr td div.msgtext
{
width: 640px;
overflow: auto;
} Use the same Max width in the Fireboard configuration.
```

I did this and its a good fix for larger images, but...

this is more of an annoyance then a problem but not matter how big or small the image is it has a scroll bar on the side once a user puts any kind of picture in the post. even the smilys and quotes have scroll bars.

Anyone have a fix?

to see a post with scollbars visit

Re: HOW TO? Large images scroll

Posted by noskillsskate - 2008/04/16 21:00

Heres my fix for the profile area in the posts having scroll bars. on my forum it seemed to have scroll bars cuz the profile pictures were to big for the area it sat in so it needed the scroll bar.

So i went to my fireboard template .css and searched for fb-msgview-l-cover. put a width in there of 150px and the scrollbars vanished.

=====

Re: HOW TO? Large images scroll

Posted by ventasman - 2008/07/12 11:37

None of the solutions worked for me:

the code one: the code to overwrite just isn't on the file.

Te css one: i placed the css on the css file and it didn't nothing.

Any news about this will be great!.

=====

Re: HOW TO? Large images scroll

Posted by TauTau - 2008/07/20 15:06

I tried the .css solution, it's not too good. In firefox 3 the images are only visible in the width set in the fix, no scrollbars. In IE 6 I get a horizontal and vertical scrollbar, but not for just the images but the whole article. That way text also must be scrolled to read. Any other ideas? What is multithumb?

Lars

Edit: just noticed that in Firefox 3 I also have the horizontal scrollbar for the whole article.
